Company profile

Company Name	: Technomobs IT Solutions
Industry	: IT services,Networking Solutions & Software Development
Year of foundation	: 2011
Services	Custom software development, Mobile Application Development, Design, Redesign, Support, Integration and maintenance of custom software, Software testing, Information technology consulting Writing technical documentation, Search engine optimization, Custom web-design and original artwork, Networking & CC camera Distribution and services.
Corporate Offices	: India, UAE, USA,Italy,Russia.
Website	: www.technomobssolutions.com
Phone	: +97167403797, +971561458489, +97156935 0779
Email	: info@technomobssolutions.com
Address	: Office - Shiek Khalifa Bin Zayed St, Al Swan - Amberjem Tower Office E1-917 - Ajman. United Arab Emirates

Why Technomobs?

In the past 3 years we have overcome most of the technical barriers raised while development is going on with a smart smile. We have got stable clients in 15+ countries in total around the globe. We have now equipped with highly skilled, talented and innovative programmers and designers with us to challenge even the technology giants. We follow a special way of tactics behind each and every project / each and every client, so that others get envy upon our strategy and implementation of smart things.

Vision & Mission

Our techie team is a cluster of smart persons who are well trained and armed with all the necessary technical sacks to take care of the Development. Hence the products we mold have the peculiarities with top quality, top performance and high tolerance level. We have a support team – which include highly qualified professionals in the field of top quality service – could withstand with any circumstances they face. These all specifications make Technomobs – "the most envious" company around the globe. We concentrate on customer satisfaction – because we matters our customers' relief rather than the cost incurred. We take care of the contracts to be handled within the time-frame without any differences made.

Price and Quality

We offer high-quality and cost-creative software development services. Delivering offshore software development services recognized by the best quality, timeliness and creativity at prices considerably lower than those onshore or near shore, we help our clients to extremely reduce the costs of IT-development.

Services

We comply with the latest development and technology standards, apply cutting edge software engineering methodologies and integration procedures adjusted to every specific case.

- Custom Software Development
- Maintenance of Custom Software
- Information Technology Consulting
- Original Graphical Document
- Camera Security Solutions

- Design
- Re-design
- Support
- SEO
- Integration

- Mobile Application Development
- Writing Technical Documentation
- Custom Web-Design
- Software Testing
- Networking

Providing

Technomobs provides software development services. During our more than 3 years of being in operation we have been involved in projects dealing with many areas of IT, however, the best results achieved by us lie within the following spheres:

Web Application Development

Since 2010 we have used Java, PHP, ASP, and now we also utilize .NET, Python, Ruby to implement server-side functionality and have been working really keen with such technologies as LAMP, Ajax, J2EE, Spring, Struts, Hibernate, WPF, Symfony, Grails, RoR, jQuery, ExtJS, etc.
Custom software development for Windows, Mac OS and UnixIn this sphere we have managed to aggregate knowledge and experience at practically all levels – from low-level software development (for example drivers for Windows and Linux) to developing user interfaces with .NET, Objective C, Qt.

ERP, Database design, Development and Management

We have gained an extraordinarily rich experience working with such well-known databases as MySQL, Oracle, MS SQL Server, Postgresql, MS Access. We have lately worked a lot also with the so-called NoSQL engines like MongoDB, CoachDB.

Mobile Software Development

Our specialists have developed dozens of applications for iPhone or IOS, Android, Windows Mobile, Symbian, Windows Phone 7, BlackBerry and we are continuously expanding our client list in this field.

TECHNOMOBS

Experienced In Technologies and Programming Languages

We comply with the latest development and technology standards, apply cutting edge software engineering methodologies and integration procedures adjusted to every specific case.

Java

- JDK, J2SE, J2ME, JavaFX, Groovy, AWT, Swing, Applets, Java Beans, JNDI, JCE, JavaMail, JMF, JAXP, JiBX, OC4J, JNI
- Spring (all modules) • Struts 1 and 2, JSF, SpringMVC, Grails, Cocoon, Velocity, Tapestry, JSTL, JoSSO, Axis 1.x, Axis 2.x • ORM: JPA, Hibernate, TopLink, JDO, GORM • JMS, JMX, JTA, JAAS, JDBC, JCO • Servlets, JSP, J2EE, JavaEE5, EJB • Adapters, Connectors, JCA, Neco/XHTML • JavaCC, SableCC • Java WebStart

Web and LAMP

- PHP (including PEAR, Propel, Symfony, Yii frameworks) • JavaScript and DHTML, CSS 1-3 and CSS selectors, AJAX
- Python, Perl, shell, awk, sed, tcl/tk, AJAX (including prototype.js, dojo, ExtJS, jQuery, YUI, mootools and original frameworks), • REST, Cold Fusion • WebDAV, SSL, HTTPS, TLS, OpenSSL,
- Adobe Flash / Flex / AIR • Apache modules, CGI, fastCGI

.NET

- NET Framework (1.0–4.5) • NET Compact Framework • ASP.NET, C#.NET, VB.NET, ADO.NET, Entity, MVC
- LINQ, Azure, WPF, SilverLight • Windows Forms, C# and J#, XML and Web services • BizTalk 20
- ASP VBScript and JScript, CGI • BizTalk 20 • Infragistics NetAdvantage • Microsoft Sharepoint

Application / Web Servers

- Apache and modules • MS Internet Information Server • Resin • nginx • Macromedia ColdFusion
- Lotus Domino (from version 5.0.1) • Microsoft MTS • BM WebSphere and MQSeries • Reuters Triarch
- Oracle Application Server • Interprise Application Server • BEA WebLogic • JBoss • JOnAS
- Apache Tomcat • Jetty • GlassFish

Mobile devices

- iOS, Android, Windows Phone 7, Symbian, BlackBerry, Pocket PC
- Driver development for Windows CE / Windows Mobile

e-Commerce

- Interchange • oscommerce • Intershop • MIVA Merchant • MS e-Commerce Server
- CyberCash CashRegister • Magento

CMS

- Drupal • Joomla • WordPress

Our Partner - Kaspersky

In the mid 2014, Kaspersky Lab signed its first OEM partnership with Technomobs for GCC and Asian counties. Since then, Kaspersky Lab's antivirus technology has been at the core of some of the most successful information security products available on the market. To date, the Kaspersky® Anti-Virus Engine has been integrated into over 150 solutions including desktop applications, server solutions and managed services from leading IT companies across the globe, including products from Alcatel, AOL, Blue Coat Systems, Borderware, Clearswift, Critical Path, Finjan, GFI, Juniper Networks, Microsoft, NetAsq and ZyXEL.

A wide range of software and hardware vendors, as well as service providers, can now take advantage of Kaspersky Lab technologies to protect users from viruses, spyware, phishing attacks, spam and emerging mobile threats.

Now Technomobs is technical alliance partner of Kaspersky , KFP development and installation in Asia .

Mobile Apps Development

iPhone/iPad Apps , Businesses today are looking for smarter ways to work. From simple mobile data and email, enterprises are moving to mobile apps for improved efficiency, productivity, customer engagement, and workforce collaboration. Mobility has become a fundamental element of our business procedure. Whether it is the IT, Operations, or Sales and Marketing department, there's a need for a mobile app to make a better workplace.

Do you have a mobile strategy? If yes, how will you roll out mobility solutions? Which is the best technology or mobile solution to fit your business model?

Our Mobility Consulting services can help you get solutions to all these questions. Technomobs IT Solutions with over hundreds of applications to its credit, is trusted when it comes to providing complete mobile app analysis, development, and execution solutions.

We are a Global solution provider. From identifying your business needs, to calculating ROI, and developing the applications, we offer strategic mobility consulting to help businesses define and evaluate the mobility roadmap for you.

Apart from working from our space, we also provide the right type of resources to clients on a long term, time and material basis to work from their location as well.

The market for iPhone & Android APP downloads is increasing rapidly all over world . Nowadays executing iPhone Development or Android Development project is getting a specialism. At Technomobs IT Solutions we are dedicated to consult you from mobile strategy to User Interface design (UI) to deliver the ultimate User Experience (UX).

Technomobs IT solutions delivers together both Experience and expertise in the field of Mobile app development for supporting the day to day actions of company to promote business growth at advanced level. We focus on developing world class excellent products in the global mobile IT industry. We assist the companies to get attuned to the desires and needs of their customers and go beyond the conventional pc.
We offer mobile application development services that provides comfort and convenience to our clients in the form of the following features

Android is growing fast as a platform and so is the demand for Android app development. Technomobs has been one of the early starters in the realm of Android development and has one of best Android development teams.

Our Android application developers have years of experience in the mobile application development space and are well familiar with Android Software Development Kit (SDK), OpenGL, 3D graphics, Android Media APIs, Location–based Service APIs, Wi–Fi APIs, Android Security Architecture and other technological innovation required to develop best in class Android apps.
Our experience of the Android Market Place along with our talented designers and extremely knowledgeable and experienced Android app development team gives us the assurance to take on the hardest of difficulties and deliver outstanding Android apps that you would love.

One of the key issues in developing Android applications is engaging with the OS's fragmentation. Android's software and hardware are so unique that it's not always easy to assure an app runs smoothly on all handsets and smartphones. Technomob's Android development team is very familiar with the specifics of the wide range of Android's current versions, such as degree of their interface with different hardware. Even the simplest Android applications developed by DataArt have scalable layouts and are tested for different resolutions, while more complex apps are designed for different resolutions from the onset, often providing different behaviors for different hardware as needed. We also keep a wide range of hardware in-house to execute the testing.

TECHNOMOBS
Inspiration Innovation and Smile

Windows Smart phone market has got a new competitive entrant i.e. Windows phone 8 which is appealing to surprise the market. High quality display and multi-core processor support makes Windows 8 phone a good candidate to watch out for. Metro UI also adds varied shades to it by making it very powerful and attractive.

Technomobs has proven expertise skills in the field of Windows Phone 7 app development, now it is ready to provide even better app development with the help of innovative features offered by Windows 8 mobile platform and our experienced experts who are well qualified with wide knowledge of myriad languages such as.

Web Technologies – HTML 5, JavaScript and Cascading Style Sheets Level 3 (CSS3)

DirectX Technologies – Native C++ and High Level Shader Language (HLSL)

.Net & Silverlight Technologies – XAML, C++, Visual Basic and C# (C Sharp)

Technomobs is a Microsoft Gold partner which helps it with regards to having fast access to most innovative technology and the related know how. It's certified Microsoft Professionals have complete control on the latest Microsoft Visual Studio tools that are used for creating, coding, debugging, localizing, packaging and deploying Windows Phone 8 Metro Style Applications. Owing to Technomobs's proficiency with all these Microsoft tools and technologies, it is ready to generate great services in Windows Phone 8 app development which will lead to enhanced user experience like never before.

To suit the interface of Windows Phone 8 Metro UI design style, Technomobs provides apps that are clear and interactive, fast and fluid and even more important, in synchronize with cloud that gives the user a feel of staying connected and on the move. Its solutions for Windows Phone 8 app development include:

Client's specific applications

Integration of e-Commerce, CRM & CMS

Windows Phone 8 Games of different genre

Navigational apps

Social networking apps

Productive apps

TECHNOMOBS
Inspiration Innovation and Smile

Hybrid Apps Development The beginning of so many mobile platforms, each with different User Interfaces, SDKs and different programming languages, has given an extreme rise to problem of fragmentation. The Smartphone market today is divided across various operating systems like iOS, Android, Blackberry, Microsoft Windows Phone 8, Bada, Tizen etc. This has lately been a very popular subject for technical market industry viewers to discussion. The Smartphone market is still in its beginning and it is probably too soon to have a firm point on this matter. Developing for all of these platforms is a challenge, especially for the developer or business with limited resources. So the question remains: How do you choose what platform to develop for and what to leave? It gives a drastic rise to the demand of cross platform mobile apps where the code is written once and ran everywhere. So what is a cross platform development environment? Cross platform refers to the capability of software or hardware to run identically on different platforms i.e. users can switch from one platform to the other without converting their data to a new format.

There are various benefits of using a cross platform approach.

Allows you to develop on additional platforms for almost no additional cost

The reusability of code is also an important aspect to consider

Easy access to plugins and modules that can easily plug into other services or tools

Easier for the web developers to jump in and use

Assists in reducing the development costs

Our Experience

We have created various apps using PhoneGap, Titanium, Rhomobile and Corona. And some of them have been the #1 apps in the Android market. By far PhoneGap has proved to be the most promising of all.

Customer wants us to be on the mobile device of her choice and building native apps for each platform is not a good option as it is too time consuming and requires a lot of man hours. Cross Platform SDKs can prove to be a good alternative to the native SDKs as getting started is easy and so is maintaining the codebase.

Industries Focusing

We have developed and implemented successful solutions for an extended range of industries including:
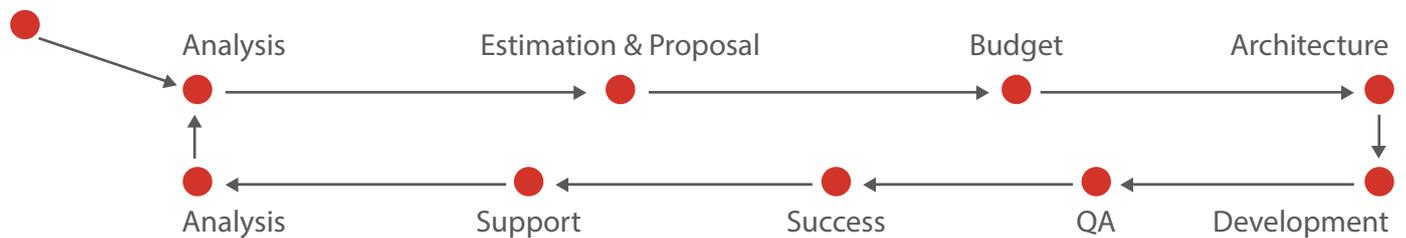

- Hospitals
- Banking
- Accounting
- Hangout places & Hyper Malls

- Insurance
- Automotive
- Real Estate

- Car Dealers
- Jeweler & Diamond Groups
- Hotels

Workflow

      The variety of projects has brought about a wide range of engagement models, working schemes and types of workflow, At Scaned we provide each project with individual workflow - everything works in the way most convenient to you. We are flexible and have enough experience to implement almost any kind of workflow preferred by the client.

Methodologies

We endeavor to apply fundamental yet personalized approach to every customer and their project. For example, we use a long-reputable Waterfall method of software development as well as cutting-edge Agile, Scrum and Kanban methodologies.

Waterfall development method is ideal for projects with clear task formalization and fixed scope of work, i.e. for small and medium-size projects. Waterfall methodology comprises the following steps:

- working out system requirements, drawing up and approving the specification:
- design and prototyping:
- development:
- delivery
- support

Agile, Scrum, Kanban etc… methodologies have their own distinctive features:

- speeding up software system commissioning:
- minimizing development iteration cycles:
- reduced periods of feedback between market/user requirements and functional implementation:
- iteration-based approach and adaptive production methoda:
- restrospective produres allow to fix defects promptly and enhance productivity and quality.
